Contact No: 9696954565

A results-oriented professional with over 3 years of experience in designing, developing, and enhancing applications.

Software Engineer

PROFILE SUMMARY

- Over 3 years of professional experience specializing in Java with a focus on Agile methodologies.
- Proven track record of delivering high-quality software solutions on time, showcasing expertise in clean, efficient, and scalable code.
- Extensive experience in developing microservices using C#, contributing to a comprehensive skill set in application architecture.
- Proficient in designing, implementing, and maintaining microservices architecture, demonstrating a deep understanding of distributed systems.
- Adept at navigating the complexities of software development projects, ensuring precision and reliability in execution.
- Dedicated to staying up-to-date with the latest trends and best practices in software development, ensuring adaptability to industry advancements.
- Strong technical proficiency in JavaScript, Java, .Net Core, C#, SQL, MySQL, HTML5, and CSS.
- Holistic understanding of project management within Agile frameworks.
- Poised to contribute an extensive skill set and significant experience, with a
- specialized focus on microservices development, to elevate projects and uphold the highest standards of innovation and quality.

TECHNICAL SKILL SET

- Front-End: Html, CSS.
- Back-End: C#,C++,Java, Dot Net 6, Entity Framework, Web Api
- Database: MYSQL
- Frameworks: Spring,Hybernate,Visual Studio 2022
- Version Control: Git
- Other Technologies: AWS Service, Hangfire, TDD, Microservices, Ocelot Gateway
- Soft Skills: Teamwork, Problem Solving, Leadership

Roles And Responsibilities Across Projects

- Developed and maintained robust .NET Core and Java applications that interact with databases through optimized Stored Procedures, ensuring high performance and security compliance.
- Implemented asynchronous API consumption patterns to interface with various external services, ensuring efficient data retrieval and processing.

- Worked closely with database administrators to design, optimize, and implement Stored Procedures, focusing on scalability and execution speed.
- Coordinated with frontend developers to define API specifications, ensuring that API endpoints meet the functional needs of the consuming applications and support seamless frontend-backend integration.
- Participated actively in requirement gathering sessions with project stakeholders to understand and align development goals with business objectives, ensuring that all technical requirements for API integration and database inter-action were clear and achievable.
- Engaged in Agile development cycles, including sprint planning, daily scrums, and retrospectives, to continuously adapt and improve the development process, ensuring timely delivery of application features.

EMPLOYMENT DETAILS

- **MindNerves Technology Pvt Ltd** *Software Developer (2021 –Present)*

KEY PROJECTS UNDERTAKEN

FleetManager (Suzlon) (2022 – Present)

Role

- Project handling system based on Java and MySQL.
- Led 4 member backend team.
- Managed authentication and authorization with JWT token.
- Created multiple APIs. Handled code reviews and deployment

Description

- Checklists and Customizable Forms: Suzlon's engineers were equipped with standardized checklists and adaptable forms to streamline their tasks.
- Offline Functionality: The app operated seamlessly without an internet connection, allowing data input and image capture even in remote areas.
- Data Auditing: Real-time data audits ensured quality control, reducing errors and rework.
- Image Upload Capability: Engineers could enhance reporting with visual documentation.
- Project Management - This app simplifies the tracking of every process and operations involved in the successful completion of the project.

Tech stacks: Java,MySQL , Stored Procedure, APIs, IIS Deployment

NCR(Non-Conformity Report) Suzlon (2021 – 2022)

Role

- Workflow Management.
- Email Notification based on Workflow.
- Pdf and Excel generate based on Workflow.
- Designed multiple forms and created and integrated APIs for the same.
- Managed authentication with JWT token.

Tech stacks: MySql , .NetCore 6.0 , Stored Procedure, APIs, IIS Deployment
